Sudio Silhouette Price: \$129

This is the latest Bluetooth, in-car phone speaker from WA provider Sudio, and the profile is much more attractive and user-friendly than other models, many of which look like a miniature UFO in your car.

Once again it clips over your visor, but it's flat and doesn't restrict movement either of the visor or your head. **Sudio's car phone device.**

It's easy to pair with your phone and operate with easy-to-reach volume, call and hang-up buttons. There can be a little lag at times, not enough to make talking a chore but enough to niggle. But it's a great low-cost in-car solution.
