## Sudio Vogue: Strike A Pose With Your Bluetooth CarKit

Posted by Nick Broughall at 12:30 PM on October 27, 2008

Bluetooth carkits aren't exactly what we'd call *exciting*. They all do the same thing - connect to your phone via Bluetooth and let you make and receive handsfree calls. Some of them even let you make calls using your *voice*.

The Sudio Vogue's claim to fame is that it's Australia's first "coloured" Bluetooth handsfree speakerphone. It comes in a range of colours, including metallic blue, pink, black and white. You get 10 hours worth of talk time and 480 hours standby on a single charge, plus regular call features like one touch answer, call waiting, last number redial mute and call reject.

Like I said: *Exciting*.

Still, even though it's not the most riveting product, it's priced well at just \$89. And sometimes the cheap and useful products that come in a range of colours are the best ones. Sometimes.
