**SWEET TALKER**

Black, silver or ugly are the three looks usually associated with hands-free speakerphones. But now we can add metallic pink, blue and white to that list. Sudio's new Vogue jazzes up speakerphones. You clip it to the car visor, pair it with a Bluetooth mobile and when a call comes in just hit the big button and speak. Sudio Vogue has 10 hours of talk time, 480 hours on standby, call waiting, redial, mute and call reject. A visor clip, car charger and USB PC charger are included. It's a sexy \$89.
